SUMMARY

Software Engineer with 3+ years of experience taking AI and backend systems from prototype to production at customer sites. Led on-site deployments of computer-vision monitoring platforms for enterprise manufacturers including Coca-Cola, ITC, Unilever, and Hyundai, integrating with PLCs, edge devices, and legacy infrastructure. Owns the full loop from client requirements to build, deployment, training, and adoption. Currently pursuing the NextLeap PM Fellowship.

TECHNICAL SKILLS

Languages: Go (Golang), Python, C++, SQL, JavaScript, Dart

Backend & Frameworks: Gin, Chi, Django, React, Qt5/Qt6, Flutter, REST APIs, WebSockets, JWT, GORM

Cloud & Data: AWS (EC2, SES), GCP, Docker, Jenkins CI/CD, Linux, SSH, PostgreSQL, SQLite, Firebase

AI & Edge: YOLOv5, TensorRT, OpenCV, MediaPipe, Gemini, Jetson, Rockchip, Buildroot, PLC (Modbus, LOGO!)

Delivery: Client Onboarding, Requirement Gathering, Technical Documentation, Agile, Jira, Confluence

EXPERIENCE

Product Developer (Freelance)

Nov 2025 – Present

Krisko

Remote

- Built **FaceShape AI**, a real-time web app (React, MediaPipe, Django) combining computer vision with Google Gemini in a hybrid ML pipeline to analyze facial features and recommend eyewear.
- Developed the **Go backend for an IELTS exam platform** (REST, PostgreSQL, JWT) covering exam delivery, evaluator queues, analytics, and streaks; shipped with Docker on GCP.
- Built **Econ**, a lodge management system in Go (Gin, GORM/SQLite) with GST-compliant billing, shipped as a single binary in an Electron app for simple on-premise installs.

Software Engineer

Aug 2023 – Nov 2025

Perleybrook Labs Pvt Ltd

Kerala, India

- Led end-to-end, on-site deployment of AI monitoring systems at enterprise sites including **Coca-Cola, ITC, Saint-Gobain, Unilever, Godrej, Hyundai, and Kia**, maintaining 99% uptime while integrating with each client's legacy infrastructure.
- Served as primary technical liaison between clients, product, and engineering; translated shop-floor requirements into engineering tasks and ran 10+ training sessions, driving 100% adoption of AI dashboards.
- Engineered industrial PLC integrations (Modbus, Siemens LOGO!) with Flagman software and SDK integrations for edge AI hardware (Jetson, Rockchip), including customized Buildroot OS distributions.
- Fine-tuned YOLOv5 models for PPE compliance, vehicle detection, and activity recognition on 20K–100K+ image datasets; accelerated on-device inference on Jetson with TensorRT and FP16 quantization.
- Built SSH-enabled remote diagnostics and WebSocket streaming in Go for low-latency monitoring of deployed systems; automated 100+ daily client notifications via AWS SES, cutting manual reporting by 90%.
- Migrated a 50K+ line Qt application from Qt5 to Qt6 (10% faster) and built real-time C++ detection modules with spatial-temporal event triggers; managed Jenkins CI/CD for staging and production.

PROJECTS

Cloud-Jazzz | Go, Chi, SQLite, JWT, REST API

- Self-hosted cloud storage server with JWT auth, SQLite (WAL), chunked uploads, path-traversal protection, and HTTP Range video streaming; ships as a single binary via go:embed.

EDUCATION

Sathyabama Institute of Science and Technology

Chennai, India

Bachelor of Engineering in Computer Science and Engineering (CGPA: 8.57)

2019 – 2023

NextLeap

Online

Product Management Fellowship (In Progress)

2026

CERTIFICATIONS & LANGUAGES

Certifications: Python (Coursera); Flutter Framework Training; JPMorgan Chase Excel Skills (Forage)

Languages: English, Malayalam, Hindi
